Introduction

Few terms carry as much gravitas as “rape” in Western culture. It is incorporated into all manner of war crimes, abuse, and expected coercion of sexual assault both among binary parties and non-binary gender to carry stigma in power struggles and humiliation of political as well as military and social enemies.

While the term is reserved for sexual penetration of the body in any manner, through the vagina or anus or orally, the concept is inherently tied to the protection of physical health and reproductive rights.

For this reason, and in concert with practical dangers of injury and sexually transmitted disease including pregnancy without consent as a form of abuse, and in cases of sexual assault in American and Asian and Arab prisons, “rape” has carried a tremendous force in the language of every culture as a humiliation – even after the advent of the decriminalizing of sodomy and popularity of sodomy among homosexual communities and some women in the general population seeking equity with male fantasies and male qualities popular since ancient Rome and Sparta.

The exclusive place of “rape” in language is further reserved in law, to suggest its use in any other form would be a disservice to victims of physical, forced, coercive sexual assault, limiting its application to exclusive areas of law.

This has created a vacuum between lesser charges of assault – the act of interfering with others rights – and of battery – the act of physical contact in the course of such abuse of rights – and lesser verbal and written forms of communication vastly decriminalized in abuse with the 1991-2023 public use of the “Internet”, a collection of private networks having no governance or central authority.

In the 21st Century, from 2001-present, a group of commercial unregistered vendors and their employees have sought to assume governmental authority over the “Internet”, and to engage in tactics to abuse persons who resisted these policies, practices, and commercially motivated use of the “Internet” in very large metropolitan and state and national transport provisioning – which enjoined family violence and child abuse, public fraud, and sustained a criminal misuse of the franchise of Interstate Communication for private violence under criminal negligence of the Bush Sr., Bush Jr., Clinton, and Obama administrations of the United States.

This conduct, which promoted “extremist” socialist practices and claims as if mental health, appealing to new customers in PEOPLE’S REPUBLIC OF CHINA, INDIA, IRAQ, SAUDI ARABIA, and former SOVIET UNION break-away countries, backed by NATION OF JAPAN in its role to be a technology provider and overcome Canadian based Northern Telecom and United States based “AT&T”, enjoined Deutsch Telekom and other providers (Telia) of Germany and Sweden, to bring radical and illegal tactics into the Internet marketplace.

Aided by Panama, Brazil, and Argentina – and sympathizers to prior national socialist workers party members of the German 20th Century – these groups actively abused the INTERNET CORPORATION FOR THE ASSIGNMENT OF NAMES AND NUMBERS (ICANN) and INTERNET ASSIGNED NUMBERS AUTHORITY (IANA.ORG) to violate their charter in RFC-1918 and assert fraudulent monopoly claims against independent “private networks” in 2001-2023.

The tactics used by these “extremist democratic socialist” groups, similar to “Young Hegelian” theology of the early 20th Century, sought to criminally style persons objecting to this action of a quasi-government over all International and continental traffic as a “mental illness” falsely, using tactics of the Nazi Regime employed in the Holocaust, and through abuse of children and the families of persons resisting such takeover of computer industry services barred by The Constitution of the State of Oklahoma – Article II section II-32.

These claims were both absurd, but effective, because of their appeal to large groups similar to incitement of genocide based on racial and ethnic stereotypes, as well as intimidation of the courts and law enforcement to deny civil relief in the separation and concealment of families for over 20 years of sustained abuse without legal cause or due process. The actions further extended to targeted attacks on commercial rights protected by Oklahoma Constitution Article XXIII section XXIII-1A “RIGHT TO WORK, and to assert that civil contracts and civil court judges

had the power to nullify criminal law and criminal protection of victims to satisfy arbitrary orders; styling contracts made with product users as “superior law” to United States Federal and State Criminal Code, Statutory Law, Regulations, and protections guaranteed by the Constitution and State incorporation documents.

Further did the parties seek to overcome the authority of the Oklahoma Secretary of State, alleging that the commission of business granted by the State or United States was void unless recognized by the collective groups and endorsed by their authority and working vendors and partners, a violation of Oklahoma Constitution Article XXIII section XXIII-1A, and a crime.

This activity incorporated pursuit and abuse of the victims over electronic forums in 2001-2012, onto MySpace.com business in identity theft, pursuit onto Facebook.com and Twitter.com and Instagram social media service, and by mass email, direct threats to attorneys in mass mailing of commercial fraud, false employment claims on behalf of TEK SYSTEMS and TERRABOX.COM CO by ROBERT HALF TECHNOLOGIES and COGENT COMMUNICATIONS INC. contractors, and assault from networks including DIGITAL OCEAN and OVH HOSTING in concert with TELIA (ARELION / TWELVE99.NET) companies affiliated with the parent firm NTT COMMUNICATIONS and their officers working labor group domreg@lostserver.net and LOSTSERVER.NET hosts ATLAS, TITAN, and PATRIOT. These actions continued in LOOPBACK0.NETWORK servers HARPOON and SATURN, and in letters from don@depref.net of Reykjavik Iceland registration, on behalf of the prior THECHURCHBOARD.COM community engaged in this fraud and extortion for NTT COMMUNICATIONS and COGENT COMMUNICATIONS INC. businesses, and use of the 2323 Bryan St Dallas Texas and 1950 N Stemmons Freeway sites of EQUINIX and DIGITAL REALTY TRUST INC. to support such works in fraud and harassment – continuing in 2021-2023 from Casper Wyoming and Fort Collins City Employees in Fort Collins Colorado and through use of the Denver Colorado data center there.

Organized commercial stalking of this kind, in concert with targeting of whistleblowers at the NORTEL NETWORKS \$250 billion bankruptcy and data breach, reported by Brian Shields and members of the Wireless Engineering Tools Division at Richardson Texas campus of NORTEL NETWORKS; exposes the nature of such abuse and commercial intent to defraud in a premeditated and criminal scheme involving both child taking, child abuse, debt bondage, and forced labor demands ongoing as of 2021-2023 threats of false incarceration and false arrest in writing.

The use of such material, incorporating also ICANN registration in 2002-2004 of a “littlebitch” site to seek public aid in this extortion of commercial career of the engineer and family targeted by this group under color of a public solicitation using their full legal name and such legal name as an email to solicit Title 21 Section 21-5-104 criminal arrest and detention of the parent to thwart ORDERED POSSESSION OF A CHILD, INHERENT RIGHTS of a parent to possession of the child without condition taken from their home to extort, and false trial on fraudulent civil cause of action (abandonment – in a kidnapping; and then marriage – where no marriage or divorce existed in law), show the failure of the State of Texas and United States to curb this behavior over a 20 year child concealment lacking all due process. Sustained on fraud to color the parties and witnesses as non compos mentis using social media and ICANN / IANA.ORG abuse refused legal service in the State Bar Association to defraud the United States benefits of the TITLE IV AGENCY as if a “state agency” and “state sovereign immunity” a defense against abuse.

As this continues in ongoing active computer network abuse exploiting the NTT COMMUNICATIONS and COGENT COMMUNICATIONS INC. network and multiple well known server renting and hosting firms to stage attacks in 2023 February, following extortion letters in October 5 2022 and February 4 2023 to threaten false civil suit; the question of what “social network” and other “computer network” public use and law enforcement defects exist to combat international exploitation of very large communications services directly connected to customers, employers, and family members of individuals designated as “Democratic Socialist Movement” enemies; even where such movements or organizations are unaware the cause of action is a fraudulent one due to court fraud or State corruption. Where such threats speak to the elimination of sexual and intimate rights by violence and false arrest, against heterosexual persons using misgender and race and ethnic character as traits, genuine hate crime felony laws even revised in 2022 April like the 18 U.S. Code Section 249 anti-lynching and conspiracy claims fail to encompass the scope of such organized attack on the “civil honors” of persons.

The ability to extinguish a person's ability to maintain employment, to leave their home for work or travel, or to receive public and city and State and Federal law enforcement help when threatened or their property or family molested, is substantial – and merits a review of the nature of such crime beyond “assault” or “battery” using electronic means defined but declined enforcement in State (21 Oklahoma Statute 21-1172) and Federal (18 U.S. Code Section 2261A) anti-stalking laws and other protections against conspiracy against rights (18 U.S. Code Section 241) and equal protection requirements (42 U.S. Code Section 1981).

The incapacity of District Counties in Oklahoma and Texas (USA), combined with competition between city and State Justice departments for traditional criminal tasks, paired with a refusal of Federal Justice to act on matters without first receiving referral and support from the local and State agencies – and in a \$50,000 USD minimum cost to the United States to qualify for performance of Federal Law Enforcement by policy under the prior administrations – thereby denying protection to millions of Americans – obligate closer examination and discussion of self-defense rights (22 Oklahoma Statutory Code, section 22-31) and due process requirements in Federal Law (18 U.S. Code Section 3161 Fast and Speedy Trial) and State Law (Oklahoma State Statutory Law Title 22 Section 22-13), incorporating the test in *KELLEY v KELLEY* (Oklahoma Supreme Court, 2001) of excluding hearsay evidence from preliminary investigation to bar formal criminal protection obligated by law.

Like child sex offenders, these abuses are done by persons who are familiar with the low penalties for “rape” and minimal penalties for “rape of a child”, which afford abuse of minors to be a far more lucrative and profitable method than conventional media would admit or report to the public; and in fact misusing the rules made to protect victims in some circumstances as a general excuse to deny reporting and protection to victims afforded other major crimes supporting critical observation by local, state, and Federal media.

The use of the “Family” aspect to shield such criminal conduct from examination, or worse – to seek to separate family matters as if they do not exist at all in concert with criminal coercion and duress of commercial business or crimes against the state or United States; has given rise to the same “under color of law” abuse found in the child health and separation policies of the Reichstag of Greater Germany under the 1930s Nazi Powers administration.

An administration that openly used rape as a means of abuse, and whose invention of other forms of abuse and torture not described by prior law and under color of broad state and class immunity, led to a war that should have remained concluded without the advent and subsequent tolerance of such activity again on the digital platform afforded by “The Internet” and those seeking to assume a quasi-international and formal “government” thereof.

Many of whom are representatives of those very radical ideals from the 1940s and intent on a modern resumption of hostilities and authority, secure in a presumption of capital mobility and capital superiority granted by state-sponsored adoption of their technology to install in them a substantial political and commercial control over the commerce, communication, and right of way in International trade not afforded or intended in the license of the Internet and its products, services, and connection contracts explicitly (See RFC-1918).

“The Internet” is not a monopoly, nor exclusive of all computers connected to other computers, a right of sole service for those systems and technical forms of trade. It has competitors, in “Internet 2.0” and “NIPR/SIPR” (MILNET), and other products and services legally separate from the IANA.ORG and ICANN group. Further, such groups have no legal right to assume control over the equipment of users beyond what the contracts they grant support, nor install in such (Oklahoma) contracts a themed monopoly or exclusive use of Top Level Domain services (TLD) which represent the domain name registry of the prior specific **private organizations**.

This concept, that such public facing services like the TLD (Top Level Domain) servers of IANA.ORG and ICANN are **private organizations** (not government agencies) and **foreign organizations** not entitled monopoly or honor by all users, is being over sold by the prior groups, to the extent of an authority never granted and to interfere and intimidate the United States trade and Interstate Commerce rights of persons to assert such false claims.

All a person has to do is change their TLD root servers, or those in their organization or ISP Domain Name Server(s), and they will be on a completely separate network than those organizations. Such networks do not have a legal right to interdict the transport of data based on such monopoly claims, nor are they entitled to make contracts to do so; denying them the exclusive right to over a service globally to the United States and State of Oklahoma per Federal Constitution Article IV section 2.

Further, wholly private physically separate lines and connections built by **private individuals** including wireless methods like Starlink, are wholly separate and can conduct their business as they wish in concert with their grant of connection to users.

Obviously such businesses will negotiate among themselves privately for transport of services and routing, but no cooperation warrants the nature of claims served on our office in January 30th 2022 threats to extort and blackmail then sustained in February 2022 to February 2023.

The intention to knowingly, criminally, and with malice of perpetual injury and menace both to individuals and against those persons who are by association either in commerce or private life or intimate partners or any combination especially – is a form of organized criminal activity that exceeds general “racketeering” and “corrupt organizations” activity – is both stateless and deceptive in its use of LEGAL NAME FRAUD – and engaging there also in “slander of title” to overcome the title of property both physical, intangible, and real estate or other real property – and especially where such title is to children or guardianship of family members or their power of attorney to compel surrender of rights and commercial use of property - that requires explicit designation.

To this end, we have on substantial evidence of “sexual harassment” and “sexual themes in letters threatening”, paired with actual United States Postal Service fraud and theft documented in the prior matter to extort, and sustained claims to overcome the rights by law of persons and falsify for criminal commercial loss of standing and authority, to overcome and disable public office, and to defraud the State of Oklahoma and People of the United States and People of the Chickasaw Nation Reservation and other Indian Territories – elected to specify a new offense in the registry of the IMPERIAL AMERICAN COALITION and IMPERIAL AMERICAN JURISPRUDENCE regulations and rules, covering this conduct as a premeditated and organized activity without respect to other States or Nations or any law of foreign jurisdiction, a serious offense against the members of the service and NETWORK DESIGNATION known as SEVEN ALPHA™.

SEVEN ALPHA™ is a **private network for registered data exchange and registered data users** similar to MILNET, and segmented from “Internet” services by GATES designed to refuse anonymous traffic and protect transport over 3rd party systems.

Designation of this new form of abuse is generally classed under the chapter “REICHSTAG TACTICS”, regarding radical democratic socialist misconduct disregarding the rights and protections of persons, titles, and human life.

Specific designation of this offense is “Social Rape”, and those persons engaging or supporting such activity on first offense subject designation within the scope of SEVEN ALPHA™ property and records for sanction as “SOCIAL RAPIST” for offenders determined to be engaged directly by reliable **information** in the conduct; and “PATHOLOGICAL SOCIAL RAPIST” for individuals and persons (including organizations used repeatedly or for a duration subsequent notice of violation) as a designated confirmed participant in a pattern, campaign, material support, endorsement, incitement, or sustained promotion of such claims to injure the Title 21 Section 21-8 civil honors of persons to overcome them in any method not afforded such right by law.

The right of posse comitatus designated in The Posse Comitatus Act of 1878 June 18th (Pub Law 45-263) does not apply to private organizations other than the Federal and State Governments of the United States, nor may it suspend the Oklahoma State Statutory Law Title 76 Section 76-1 and 76-6 and 76-8 rule, to afford “all necessary force” a relief in 76-9 rule.

CHAPTER 1

REICHSTAG TACTICS

The Republic of Greater Germany, from 1933-1945, is infamous for its abuse of persons. During such time, its seat of power was the Parliament Building in Berlin Germany, known as the Reichstag to those who planted a flag on it in 1945. The failure of that regime led to the flight of criminals to Sweden, Argentina, South Africa, Japan, and China, who appear in 2001-2023 to be sustaining their actions through multiple Swedish software companies and publishers enjoined with Iceland, Austria, Belgium, Germany, Japan, China, Argentina, Panama, Canada, and specific United States member States in State of Michigan, State of California, State of Texas, State of Florida, and State of New York in a coordinated and criminal manner.

These groups appear to have organized through sex work, vice, narcotics trafficking, and the music industry venue access to marginalize traditional Weimar Republic values and Democratic political and social views popularized in the World War I to World War II era underground activities and subsequent deviant activity and sex work made common in post-war Europe; and monetized such services using Modern Internet Technology to conceal this rapid development in concert with optical Internet to promote deviant and predatory sexual and social policies to entice young persons to support and participate in this behavior and political radical criminal behavior.

With the advent of social media, the groups appear to have adopted prior “false flag” activity similar to the “Reichstag Fire”, organizing and then identifying persons or political opponents for targeted diverse abuse; under color of ordinary private and civil activity, while operating outside of the civil process and to thwart the intent of the civil court and promote violence and gangland activity as a collective principle to young persons. This appeal through increasing multiplayer large community interactive media, has evolved to support a violent artificial atmosphere of abuse where adults routinely engage in behavior of an immoral nature while protected from such consequences by the context of a fantasy media, and actively teach, promote, and entice younger audiences to join in this activity as a methodology to build personal credit and ability against other groups in populist activity.

Game marketing companies initial use of this “massive multi-level marketing” strategy, to give advantage to the users who brought more subscribers, quickly devolved into a clear and evident pay-to-play and pay-to-win strategy across multiple users and accounts, paired with the ability to print and convert digital currency (in-game tokens and goods) to real world monetary transactions which developers actively ignored to increase subscriber base and net earnings contrary regulation and abuse, exploitation, and injury to ordinary players – even engaging in the practice themselves directly.

Basic rules of civil society under such conditions over 20 years declined, and created a focus for many persons raised in concert with these communities to then apply what they learned in business and adult markets, industries, and real-world jobs and securities – having obtained practice from game theory in criminal conduct and foreign instruction over two decades.

We therefore see, in present form, a formal and organized criminal enterprise activity – which is enjoined to the abuse of Internet services, and while such technology is not inherently corrupt – these groups are as serious about the injury and commercial and industrial harm they are causing to real world victims as they are as teenagers in a game environment; and pathological pattern offenders unable to change behavior without direct real world interdiction in their antisocial and malicious – criminal – behavior. The effort to deny enforcement against such high functioning criminal conduct, and to deflect such work on the Civil Courts exclusively, deprives victims of the organized activity from protection made in the Criminal Code that is not afforded by civil courts. As the civil court assumes any criminal conduct of sufficient degree or proof would be handled by Justice Department services, and styles **wrongly and improperly** such context as a “civil arbitration” where both parties appear in “good faith” to submit to the authority of the court; and such injury or delay caused by this process of *de minus* (no value or merit) by which dilatory tactics and evasive conduct cause irreparable and serious harm to time-sensitive markets, intellectual property value and rights in a timely sales cycle, and serve to impair the right to franchise which is vital for the operation and marketing of contracts and receipt of value from personal, family, and medical needs.

In short, the Civil Court is too slow to respond to threats – and Criminal Justice has abstained from its duty in violation of Title 21 Oklahoma Statutory Law Section 21-1305 – to the degree of alleging itself criminally incompetent to apply basic law or criminal protection for victims; while maintaining a presence to threaten and deter victims from making resistance or objection necessary to stop large scale (global) fraud against their business, legal name, commercial and personal reputation, and to enable substantial loss of life and property as a result of this overreach into the private lives and property of such persons through negligence of the United States and false claim of “lack of evidence of a real crime” while systematic sexual assault and threats of commercial and personal nature are being sustained in plain view of the public.

REICHSTAG TACTICS were first documented in the use of the Roman populi uprisings and later in Nazi Stormtrooper abuse and threats and murders during political activity; and in the use of claims that such persons who do not support those actions are “mentally or morally ill” to impose a stigma of unsound and erratic behavior stripping them of ordinary civil rights on stereotypes of a clearly malicious and fabricated nature.

While any of these actions alone and within an organization would be deemed “**sexual harassment**” or similar abuse of other coworkers, the connected nature of the Internet to allow employees of one company or several companies, or leased services of a 3rd party in a pattern of employed abuse and harassment to divest jurisdiction and confound law enforcement and civil protective orders power to stop abuse and unsolicited contact – results in a clear position where **private corporations and organizations, communities, and groups** must take actions preemptively to stop abuse in pattern assault and battery of their property.

The key to these degree of right of action is “assault” – an abuse intended to interfere with the normal rights of a person; and “battery” – an abuse that physically or electronically alters the nature of a digital service or utility or publication with clear intent to cause injury or violation to its value or those that work there or their privacy and right to conduct ordinary business there separate from such interdiction, similar to the “right of way” in International Law and Law of the Sea, for which the interface of interstate commerce is the “Internet” or similar service of optical or wireless or physical circuit connections for which those acts are injuring one party to grant clear advantage to another without compensation and to disable their vessel in commerce.

In this case, the ESTATE AT LAW is the INCORPORATED PERSON and LEGAL VESSEL OF COMMERCE targeted, in the United States Social Security Account made for payment of benefits to that real and living person.

As is the ESTATE AT LAW made by an INCORPORATED PERSON also a company who is the target of such false claims to abuse and harass, regardless of their origin in family law or public commerce or false claims.

Both abuses are an act to intercede in the normal and ordinary rights granted and pledged use by the natural person or persons who have authority over that estate, and in the protection of the natural persons who are beneficiary or work at or purchase from or frequent and socialize there also regardless of commercial activity.

This is covered under the Oklahoma Anti-Terrorism Act, generally, and specific to place of business as a target and means and definitions of such interdiction incorporating electronic messages both of violence or other fraud or threat or enjoined any such abuse to impair or tamper with contracts.

While Tortious Interference (contract tampering) would cover such activity between REAL PARTIES, parties who have an ESTATE in the United States system of Courts and Law, the use of false name and foreign jurisdiction paired with for-hire-abuse from foreign jurisdictions to thwart civil process; and crowd-sourced violence to deflect and divert law enforcement across multiple states, makes crime using the Internet or U.S. Mail or other Interstate communication method exceptionally hard to address.

Improper refusal to act under presumption that such crime is external to the District or State, and so the perpetrator poses no “physical” threat to the “victim”, is incorrect in such activity – both due to mobility and capital gains in such fraud affording travel among the many states, as well as for-hire activity of criminal service.

CHAPTER 2

SOCIAL NETWORKS PRESUMED DUTY AND FAILURE

Social networks, such as MySpace.com and Facebook.com (META), and related INSTAGRAM and file sharing services for display of pictures like SnapChat, afford a criminally incompetent and unlawful “private venue” which not only facilitates this form of criminal “Reichstag Tactics”, but is evidently a practice of employee abuse and sale of employee access that cannot be properly addressed by United States corporations or their staff.

Blocking a person does not remove them from the network, or remove objectionable content, nor removes the injury of having to monitor such content by a victim creating an unjust and criminal “labor or service” upon the victim to maintain their privacy and rights; for which governments like People’s Republic of China have correctly recognized is a criminal enterprise requiring strong protection, and the Russian Federation likewise realized represents a serious breach of security and privacy for its people when hosted outside their courts jurisdiction and authority to overcome on local and lawful demand with penalty.

The initial premise that the Internet is a “special safe place” under the protection of the United States and its courts, accessible by other countries to experience the freedom of speech and other rights deemed protected in its Constitutional Law, has never been true or correct. It is regulated by private companies for their own interest and profit, contrary the Laws of the United States and the Constitutional Rights thereof, and such speech mutilated and employed to create extortion over persons and public discourse contrary 47 U.S. Code Section 230 rule.

Further, false application of the improper generality “all speech is free speech” to protect “explicit quid pro quo extortion, blackmail, improper use of images and alteration of images to extort, and extortion of commercial businesses in concert with real and irreparable harm”, have been documented from 2001-2023 in fraud and human trafficking, to admit criminal incompetence to provide a basic level of enforcement and protection of law by local, District, State, and Federal authorities; and a gross negligence of criminal degree by Districts and States hosting such services, including experimentation using children and private gathering for redistribution and data mining of personal user information; now being tendered to the public in a digest format as “NVIDIA OMNIVERSE” and “NVIDIA AI” products, whose core content is derived from works the end-user and public deem to be copyright protected material never granted release to such companies for this purpose; and the automated nature of such technology jointly beyond the comprehension of risk to all non-technical audiences enticed to endorse such contract – a clear attack upon the public similar to “Blue Sky” laws and promises to naïve investors in the 19th and 20th Century.

While these are “**private communications institutions**” – their application and self-direction in merchantability and fitness of purpose to serve as general communications utilities, void this use of data and media; styled to resemble private hosting and privacy rights of fully owned network infrastructure; from which a long term plan to derive value from sampling of a clear and automated nature is a direct and express abuse of persons and rights.

Foreign courts may suggest civil rights can be waived by such companies, fundamentally and broadly, in violation of Oklahoma Constitution Article XXIII section XXIII-8 and XXIII-9. They cannot. And such claims are sedition against the United States and State of Oklahoma on prima facie.

Having been subjected to repeated moves and false claims, such as the Treaty of Pontotoc Creek, the Native American delegates were sure to include such clause, then ratified in the year 1907 by the Congress of the United States, and made a Federal right under the 10th Amendment and Across borders per Article IV section 2 rule.

Where persons in this product create defamatory content, then are blocked from interacting with the victim but sustain their publication(s) to harm upon the company service; in view of other customers and persons – it is a clear organized abuse. Where such persons solicit actively and aggressively those associates of the victim to isolate them in their business and family and community, those acts are “Reichstag Tactics” in plain view, denied a legal relief unlawfully on complaint, and injury to impair reproductive and intimate partner rights and damage or menace family members to submit to false claims and defraud property, are a form of “rape” of estate and rights.

CHAPTER 3

SOCIAL RAPE

Social media is an integral part of our society, both in hiring and performance as well as business and contract, which is not some franchise of the government to extend where injury is done systematically and purposefully to alter the normal relationship and right to contract of persons.

Where such activity is of clear design to that end, and for false claims and to injure, in any deceit or fraud or unsolicited communication or pattern of the above, then it is not only an improper communication not protected by the 1st Amendment, but an assault and battery upon the estate at law of the person and the natural person or persons (multiple) in the family or workplace or client base of a company subjected to such malicious abuse.

Rape deprives the party of the right to the honor and exclusive use of their intimate and fundamental trust, connection, and bond with others – which have context in both family relations and intimate partner and reproductive rights including honor and affording dignity of a right to standing in legal and cultural activity.

When such activity is to the purpose of that extinguishment, and there is no indictment worked or conviction done prior against the person, while injury is sought – the perpetrator is engaged in the violent removal of a protection fundamental to the civil society and to human life, impairing both the welfare and emotional and psychological health of persons maliciously and with serious injury, as well as attacking the financial means of subsistence for family members in the immediate right of MARRIAGE or preparation for MARRIAGE in courting and conduct, as well as care for elders and children derived from that stability and financial security.

The context of social rape is the Reichstag Practice of assignment of “worth” or “value” to a person as if it were an external measure afforded others determination, incorporated some duty to society or industry, or enjoined a benefit to society or other persons.

This activity is the hallmark of Social Rape and Reichstag Tactics in abuse of persons, and its conduct similar to previous prejudice upon false stereotypes of racism and ethnic and tribal authority, collective wealth, and collective gain or loss with endorsement of the tribe sole resource from which value and merit were derived.

Return to that “pre-human” condition of bias, is a degenerate conduct not entitled protection of law, and excommunication from the standing as a party to any civil honor or duty; which is the penalty that the party has attempted to impose without genuine authority of a lawful conviction or other work of law or due process upon another by attack. The primitive brain may see this “consequence imposed on them by their target” as an “unprovoked attack”, because it does not see or perceive its own actions to be abnormal or improper.

Perception of such wrongdoing in the initial act of violence is not necessary to afford defense by the victim, or any organized civil or political or commercial body. (RONR 12th Ed).

The right to self defense, and to protect and sustain security and privacy, subsistence right-of-way and subsistence protected human bodily functions, and other basic security in recognition of the value of intimate partner bonds and relationships without respect to formal or legal MARRIAGE or other privilege or title extended by society; is fundamental and within the scope of the 10th Amendment – a protected and enumerated right.

A party who engages in commerce, and does so to gain advantage over a competitor through injury to their actual family or to cause illness, deprive medical care, or cause death or loss of ordinary security – has no legal recourse to claim injury in any degree whether serious or similar in design or by scale against all persons who lent their support through direct action, affiliation, association, or sheer complicity in awareness of the abuse on report; without regard to their “belief” or “certainty” – a duty to answer *Hue And Cry*, and to compel their estate to produce protection or abandon their claim to it in full as accessory – per refusal to heed *Clameur de Haro*.

CHAPTER 4

SOCIAL RAPIST

A person or persons, who engages in the prior, in any degree or instance to cause irreparable personal or commercial harm, is subject to designation for this action without future relief or duration of probation, and these rights of "title" are reserved for the private person injured a Constitutional Right and for those members of their family or commercial community a Constitutional Right, for which the franchise of community as a legal organization of standing (RONR, 12th Ed) or District or State or National Government do not have a legal charter to deny to them: as this is a 10th Amendment Right and superior right against other criminal abuses which neglect and complicity are high crimes, detailed in International Treaty of the United States so ratified and made Supreme Law. (Convention on the Prevention and Punishment of the Crime of Genocide; The Lieber Code)

Whether considered crimes of war (war crimes) or Constitutional Crimes (high crimes, prohibited by the bylaws – such as corruption of blood or any similar derived abuse); such powers are RESERVED and are **expressly not delegated or denied by the People, who remain sovereign parties in contract entitled this rebuke, expressly incorporated in The Enabling of Statehood Act of 1906 of the United States, a United States Law governing the incorporation of the State of Oklahoma and pledging the collateral of territory and assets and rights and sovereign jurisdiction of the Federal Union of 1856 and all future Union territory to this contract, duly made.**

It is not the exclusive franchise of the United States, nor any government made and incorporated such as the designated legal person UNITED STATES, to suggest an authority contrary this prior lien in full.

Where the People, whether resident within the United States or outside its territory and born there under full authority and enticement of rights granted to those settlers to enter and establish in Chickasaw Nation Reservation or other Indian Territory wrongly entered by UNITED STATES, those rights maintain their force.

The UNITED STATES is a servant of the commission, duly made, in formation by a political body of The People, and by signature of Witherspoon and others, whose family stand with this force today in Chickasaw Nation Reservation as expatriate of the United States franchise the incorporating parties invoking such rights against UNITED STATES and STATE OF OKLAHOMA to withdraw and desist its occupation; an illegal action, and surrender to the Enabling Act of 1906 such property which is owing and due in Allod and Allodial title; that they have improperly obtained on failure to perform.

And for failure to recognize the enemies of The People, and to bring abuse and make war upon The People through criminal neglect of high treason and sedition, contrary to Federal Register Volume 81 Number 244 December 16 2016 Page 93492 comply with the terms of the Public Policy of the United States to wrongly enrich themselves and evade their duty of office in high crimes.

Affording to persons immunity and protection not granted, and denying equal protection of law, for which the theft and export of children to be raised in anger and against their parents under fraud and deceit for removal to foreign nations beyond the ordinary recovery and concealed there until mature, is express in case 01-17702.

That cause for severance of such Union and its State in all incorporation, is a duty then to conduct and wind down such incorporation, or admit breach and void all other protections for cause by UNITED STATES and STATE OF TEXAS jointly in fraud to overcome the Constitution of the United States and Constitution of the State of Oklahoma, an agreement before International Law.

The use of rape of estate and persons, and to falsify such natural people as deluded in their claim without due process or relief or honor of pledge of service, is identical to that of England in its seditious conduct; and of no different character or degree as policy to disbar abandonment on failure to perform such service due. Nor use of sexual harassment and assault and battery in 2021-2023 less than that of prior force to overcome Native fighters.

CHAPTER 5

PATHOLOGICAL SOCIAL RAPISTS

The employment, support, and protection in actions of clear criminal degree by the UNITED STATES and STATE OF TEXAS, and by STATE OF CALIFORNIA and STATE OF MICHIGAN in violation of the Parental Kidnapping Prevention Act (PKPA) and sustained use of company assets like META and International transport services to sustain such fraud in false claims, is not unprecedented in prior “Indian Fighting” and “Crazy Indian” schemes to defraud the territorial and land rights of the people of the Indian Territory and all Native Persons of North and South America.

Where the law will not recognize these persons, or admit their conduct, in injury to children and families – ongoing activity to raise posses to attack and abuse persons in their settlements and place of business – and to interdict in INTERSTATE OPTICAL AND DIGITAL COMMUNICATIONS subject to the EXECUTIVE BRANCH of the UNITED STATES, a duty to arrest and suppress;

And where such acts are for commercial gain whether domestic or foreign to the victims and their industry, property, or rights by other means of law – or to export and evade such jurisdiction while deterring pursuit as if persons under a Letter of Marquis or foreign orders; regardless of their registry or home port or origin of vessel;

It is the right of victims of such piracy and interdiction in ordinary right-of-way and protection-of-family bonds to pursue, engage, recovery stolen property, and take all necessary and lawful steps afforded to ensure the threat of such abuse is ended permanently and perpetually – without leave or orders of a State or National character or consent of others who have no equity in such property, to include false claims of “best interest of a child” by those who would seek possession, retention, or to carry out instruction either academic or religious or sexual or otherwise foreign to the family and equal rights of all persons of such direct sanguinity or legal bond; from which that child was wrongly and maliciously taken and abducted by force or to defraud, or any false promise of service then not done or performed. There can be no sale of such right, per Oklahoma Constitution Article II section II-6.

The very presumption that a duty of legal tender or goods or service is owing for “parent-child contact and communication” to society or any other person; having abused the parent to obtain such possession of a child, is repugnant to the Constitution of the United States and an act of war against the People by any party – including the State government, State as national character by any of its people, or Federal Union or its employees or agency or territorial claims in national character any barrier to restoration of these rights which are superior in natural law and protected by all persons of competent moral and mental character – self evident.

This is not to disclaim the rights of others or suggest an exclusive right, but to give objection on the extinguishment of the rights of one party in equity completely to afford superior control or benefit to another, based on any means of gender or labor contract with the ESTATE OF THE UNITED STATES and UNITED STATES or its member State, part of the UNITED STATES LABOR FORCE monopoly – and barred by Oklahoma Constitution Article II section II-36A.

Any person or persons, who jointly or in discussion espousing or publishing assent to agreement to a plan of action or in concert with or without agreement or discussion on the act alone and without respect there to joint activity of a partnership or other legal formality – who over time sustain such claims – in SOCIAL RAPE as an enterprise, either by informant or messenger or envoy or agency of authority, or actual performer of acts or publications to support such works, or host thereof or transport thereof on notice sustained without respect to injury – is subject registration by SEVEN ALPHA™ as a “PATHOLOGICAL SOCIAL RAPIST”, and sanction from ordinary services and benefits afforded the right of BOYCOTT and 1st Amendment Right of Federal Character against “unwilling assembly” compelled for any cause with such person or their legal or natural person, contrary the pledge of standing to others at all times in equal opportunity.

The enterprise of SOCIAL RAPE, and technical skills required to engage in such activity, are of a commercial and professional abuse of trade skills and admitted privileges of use of INTERSTATE COMMUNICATION, and as such are a delegated authority granted by THE PEOPLE to UNITED STATES and its franchise; for which that same authority is in Title 76 Oklahoma Statutory Law Section 76-9 “all necessary force” a reserved right for cause to retain and deny.

CHAPTER 6

PERSONS DESIGNATED AS “SOCIAL RAPISTS” / “PATHOLOGICAL SOCIAL RAPISTS”

Such persons will be barred in perpetuity from all benefits, honors, standards, and the protection in any kind for such actions; and deemed a foreign and hostile enemy and public enemy; refused all testimony and access to services including relief – for their initial effort to style such injury against others in malicious misuse of reporting and abuse of the “good faith” policies of ordinary records and spoliation (Title 23 Oklahoma Statutory Law section 23-9.1). As such persons under the Laws of the State of Oklahoma lack the financial ability to pay fines of “unlimited degree” and act according to such presumed limited loss in their conduct to cause serious, perpetual, and irreparable harm – they shall be barred from other honors and public office and title of SEVEN ALPHA™ along with their children in legal right, a penalty reserved for such abuse to deter such fraud where economic gains are beyond the reach of the jurisdiction or of foreign sovereign favor or title held out to entice them to act in treason against the public and injury to undermine the normal commercial and personal rights of persons – both Citizens and Natural Persons.

CHAPTER 7

HANDLING OF SOCIAL RAPE BY “SEVEN ALPHA”™

Any conduct which suggests an attack incorporating “slander of title”, to deny a “real business” or “real property” whether physical, intangible, or real property – or incorporating any demand or obligation to perform or coerce the business of persons so described criminal in Oklahoma Statutory Law Title 21 Section 21-837 and 21-838 or other rights so prescribed in the State of Oklahoma representative of those protected rights by law; whether over property or against intimate partners or family members or animals or a place of business or communication; will be immediately escalated to handling by RESPONSE TEAM agency.

Any evidence of **quid pro quo demands whether foreign or previously and subsequent execution of threat(s)** will result in a RULING entered into the REGISTRY AND JOURNAL of **SEVEN ALPHA™** services, applicable to all countries where the service shall operate or conduct business or trade; and terminate any transactions and suspend any accounts associated with the party, their INTERNET SERVICE CARRIER at the option of the RESPONSE TEAM, and without respect to customers loss or denial of service resultant from such loss of access by class to businesses or regional or national character – a risk assumed by those social and legal bodies in participation with this service.

The State of Oklahoma and its Constitution, pursuant to The Constitution of the State of Oklahoma Article I section I-2, demands “perfect religious tolerance”,

SECTION I-2

Religious liberty - Polygamous or plural marriages.

Perfect toleration of religious sentiment shall be secured, and no inhabitant of the State shall ever be molested in person or property on account of his or her mode of religious worship; and no religious test shall be required for the exercise of civil or political rights. Polygamous or plural marriages are forever prohibited.

Whereby, these claims are of a nature of abuse, promotion of polygamy in false MARRIAGE and polygamy in failure to obtain DIVORCE after such filing in 01-17702-R to sustain such activity, a fraud to obtain benefits from the United States and remove and conceal and entice from possession and prior residence a child for use later in inheritance and fraudulent commercial claims; brought under fraud on taking by force styled wrongly “abandonment” to kidnap, conceal, and abuse persons entitled paid travel over \$10,000 USD to INDIAN TERRITORY and Chickasaw Nation Reservation; and to obtain trade secrets using such tactics; the abuse of which to falsify the parties as homosexual or transgender then to overcome their “religious worship” and to molest them in their person and property on account of such beliefs – styling then a “religious test” to impose extremist values.

Those acts which follow case 01-17702-R and its example in fraud, 2002-2004, 2011, 2013-2021, and 2021-2023 repeated abuse by ICANN and IANA.ORG employees and franchise beneficiaries of COGENT COMMUNICATIONS INC. and ABOVE.NET, NTT COMMUNICATIONS INC., NTT GROUP, ROBERT HALF TECHNOLOGIES, TEK SYSTEMS, TERRABOX.COM CO, and other affiliates themed to be the OpenBSD CORE Committee and HURRICANE ELECTRIC of STATE OF CALIFORNIA, acting jointly and improperly to support this fraud, and on behalf of NTT GROUP of Government of Japan, TENCENT HOLDING CO LTD of People’s Republic of China, Asus Computers of Republic of China, Alibaba Group Co Ltd of People’s Republic of China, PARADOX INTERACTIVE AB of Sweden, EMBRACER GROUP AB of Sweden, GAMES WORKSHOP GROUP (GAW) of Great Britain, CUBICLE SEVEN ENTERTAINMENT LTD of Ireland, ALPHABET INC. of State of Delaware, GOOGLE LLC of State of Delaware, and YOUTUBE brand of such firm employed in the 2022 March 3rd to 2023 February 5th threats by FORT COLLINS CITY employee and Denver Colorado Systems Administrator(s) named there in claims of abuse from DENVER COLORADO; affiliated with prior 2323 Bryan St Suite 2670 Dallas Texas and 1950 N Stemmons Freeway locations of EQUINIX and DIGITAL REALTY TRUST INC. firms; parties documented in 2007-2023 ongoing threats into INDIAN TERRITORY in case 01-17702;

Obligate a legal sanction so made; to prohibit service to those firms under probationary rule and based on ongoing employment and access and use of such services to construct, transmit, solicit, and harm with clear purpose and to intimidate witnesses prior registered hearings on the matter; over November 14th 2021 to February 5th 2023, with injury and death of two persons and the death resultant from such abuse of two animals in the year 2022.

The designation of such persons, their accomplices, and implication of registry of services used in abuse by such parties requiring denial of access to SEVEN ALPHA™ products and infrastructure; are evident therefore in a legal policy set forth formally against this Title 78 Oklahoma Statutory Law section 78-21 and 78-53 violation themed in repetitious use of FALSE LEGAL NAME and of a PRIVATE MAIL BOX (PMB) to escape legal civil service; in registration of domain names via GOOGLE LLC in Canada to escape U.S. Jurisdiction, and ongoing abuse to sustain a fraud and hoax in human trafficking denied minimum protection of THE VICTIMS OF A SEVERE FORM OF TRAFFICKING AND VIOLENCE ACT OF 2000 and THE PARENTAL KIDNAPPING PREVENTION ACT (PKPA).

Use of terms to describe “slander of title”, “false title”, “fraudulent conveyance of title”, “legal sham” to defraud the legal standing at law of a real business to overcome its property and take children from its workers; and repeated claims to demand the firm enter into contract with VALVE CORPORATION or similar middleware provider to deliver goods for the benefit of such fraud against the will and design and interest and securities contract with actual investors on the taking, concealment, and abuse of a child contrary ORDERED POSSESSION or superior right of INHERENT RIGHTS in prior genuine title concealed and altered to embezzle benefits from the United States;

Afford a simple designation of this behavior – which exceeds simple “SWATTING” (the direction of law enforcement improperly against a person for their public exercise of streaming or media in lawful commerce);

And obligates the new designation “SOCIAL RAPE”, “SOCIAL RAPIST”, and “PATHOLOGICAL SOCIAL RAPIST”;

And that such designation is neither a legal claim of indictment or conviction by the United States or its member States, nor a ruling of the United States Justice System, nor a claim of the practice of MEDICINE or mental health grading and assignment used by UNITED STATES in its SOCIAL SECURITY ADMINISTRATION to label disability or other security or travel or special class of persons; and an exclusive right of clarification concerning the danger and intent expressed of clear physical and intimate partner violence and harm of a malice evident in 2001-2023 ongoing letters threatening and extortion demands – obligated public notice to CEASE AND DESIST or be enjoined sanction by individual and associative penalty against the UNITED STATES and/or any State or Organization whether government or labor and whether registered or unregistered, per The Constitution of the State of Oklahoma Article XXIII-1A and Oklahoma Statutory Law Title 78 Section 78-53 and 76-54.

THE DESIGNATION IS PURELY A BEHAVIORAL DOCUMENTATION of specific communication, acts, or violations of existing anti-stalking and legal communications rights, afforded a well organized political body (RONR, 12th Ed).

CHAPTER 8

THE RIGHT TO TITLE – A RESERVED RIGHT

The Constitution of the United States, Article 1 Section 9 and 10, prohibit the States and the United States from granting or reserving, compelling, or denying to other parties from whom it was made and authorized as a legal body at law; the use of “title” as a power.

Victims of Violent crime are individual natural persons, as are their families and children, and the people with whom they share a common bond and interest in trust and property.

Where such persons are, for a period of 20 years or more, subjected to such abuse of FALSE TITLE and “Fraud to slander Title” of a LEGAL ORDER granted to them, without consideration of restitution of those rights;

Those persons are entitled to assume the authority to impose TITLE upon those who did them injury, upon the act where such language does not sufficiently communicate the degree, or where other improper use of language or stereotype suggest a lack of cause for immediate and permanent relief from sexual harassment and false light.

In this respect, “SOCIAL RAPE” by abuse of technology to sustain over multiple jurisdictions in an effort to deplatform persons from their public office, the authority thereof, and especially by allegation that their RIGHT OF SUFFRAGE in a political or social or family group is conditional “PERFORMANCE” or “SUBBORDINATION” or other “PEONAGE” in-consideration of restoration or protection of the parent-child bond, protection of their parents and initiate partner, or siblings and legal name;

Denied in this case by GOOGLE LLC in a systematic abuse of public trust, under franchise of the UNITED STATES and State of Delaware, and in concert with NTT GROUP and its agency in domreg@lostserver.net and LOSTSERVER.NET members taking for concealment of a child in organized fraud;

And by refusal to act by a national character upon such works, alternating to imply an “imagined injury” contrary witnesses and physical evidence of a written criminal plan to abduct under “abandonment” claim, then applied for benefits of the United States and commercial power over the parent of the missing and exploited child – after payment and in INTERSTATE COMMERCE and INTERSTATE TRAVEL such child abducted for concealment in a premeditated plan, so barred by THE HOBBS ACT and other Federal Laws refused enforcement by STATE OF TEXAS and STATE OF OKLAHOMA in complicity with genocide from 2001-2023;

Warrant the immediate recognition of a class of criminal activity aided and abetted by ICANN and IANA.ORG abuse of LEGAL NAME and persons, facilitating severance clause of the United States enjoined in The Enabling Act of 1906, and the limited and necessary right of defense in such abuse a treason against the incorporation of the United States done by Democratic Socialist movements encouraged by foreign sovereign influence and domestic dereliction of duty in sophisticated and digital and electronic communication to neglect the duty of the compact prior made in collateral of the Federal Union, its territory, franchise, and all authority of the United States for incorporation duly ratified of State of Oklahoma, a territory improperly pledged and improperly made overlapping with Chickasaw Nation Reservation and other protected lands of the INDIAN TERRITORY.

Where words like “holocaust” and “genocide” evoke a false and misplaced dissociation with real events today, victims assert they are entitled to the LEGAL PROTECTION of their LEGAL PERSON against such abuse, as is engineered to cause forfeiture of their industry, their suffrage, and their testimony by such SOCIAL MEDIA and “private quasi-International” organizational activity impersonating a government and the Laws of the United States to overcome their family, industry, property, and right of instruction of their children in their culture and to the merit of their own convictions – a treason of Constitutional Crisis degree, far beyond civil unrest.

CHAPTER 9

PURPOSE OF DESIGNATION

It is the evident character of the major technology and optical carriers taking shape after the collapse of NORTEL NETWORKS in 2002 and dissolution in 2011 by bankruptcy; that such organizations and their industry style themselves as the legal courts of these abuses – excluding protection of criminal law to many with aid by the regional and State and Federal Justice Department.

Where States and their government further enjoin such activity, and for breach of contract with the United States to embezzle from the credit and budget of the United States for benefits on the basis of fraud;

And to enjoin their STATE JUSTICE DEPARTMENT with the office of a UNITED STATES AGENCY to exploit that as has STATE OF TEXAS in denial of all criminal protection over 2001-2023 in case 01-17702, a child taking denied due process on threat of violence and pattern of violence to seize and flee with a newborn child;

The United States is obligated to withdraw after a period of time (20 years) where it fails to perform, and admit the organization of other bodies formally prepared to enforce and press the rights of The People against such injury; and to protect property and life and chattel threatened by such abuse – in writing threats of extortion to defraud and injure and menace.

“**SOCIAL RAPE**” and the necessary associative and purposeful identification as a NEW FORM OF ABUSE associated with similar prior fraud by social class and ethnic “pseudo-science” claims “as if law” by “Young Hegelian” theology ascribed to be “DEMOCRATIC” party members in the United States; and more accurately “Extremist Democratic Socialist” movement members under foreign sovereign state and franchise direction, fully capitalized by foreign governments investment and money laundering into unchecked and unregulated open securities markets of the United States;

Which has prior been styled “Deplatforming” or “shunning” in previous communities legal systems (Amish), and is to the extent of modern electronic communication and negligence in 42 U.S. Code Section 666(a)(10) “automatic” duties failed by the member States without penalty or correction of books; a form of criminal entrapment owing express notice to cease in Federal Register Volume 81 Number 244 Page 93492-93569 and 45 CFR rule in 2017 February 21st deadline to conform by REQUIRED STATE LAW not done; then repeated in ruling by 9-0 of the United States Supreme Court in *Timbs v Indiana* oral pronouncement by Justice Ginsburg, themed case 17-1091 of the 586th Session of the United States Supreme Court; obligates the States submit or recognize the abuse as greater than “inconvenient” – in removal of employment rights, false EXCESSIVE FINES, denial of due process, refusal of State Bar Association to consider or report evidence of substantial degree, and State corruption with regional Federal Justice failure to act or report such abuse by class – beyond simple “access” or “shunning”, a full attempt to extinguish the very real and natural persons as well as the legal persons targeted, in INTERSTATE COMMERCE abuse of a clear and distinct DIGITAL CIRCUIT TERMINATION PRIVILEGE abuse subject to the EXECUTIVE OFFICE OF THE PRESIDENT OF THE UNITED STATES – a power made to prohibit such fraud not properly exercised to curb the influence of these very large securities-based corporations.

“**SOCIAL RAPE**” is an attack upon persons, afforded broadcast-like publication to injure in suspension of rights, already illegal per 18 U.S. Code section 241, refused service by the United States Department of Justice.

It’s characteristics are not civil, and have vast impact up to and evident in the January 6th 2020 riot and fraud to misrepresent evidence in such proceedings by groups to demonize and style as mentally ill all persons as a class for political gain and commercial advantage; an attack on the suffrage of the American People outright.

These attacks, and the persons driving such activity, are professional revolutionaries – operating inside corporate and commercial structure, often in duplicity with multiple groups for and with foreign agency, under color of very large foreign investment – with escape and protection afforded by such International character of these organizations to embolden their activity and lend support from hostile foreign and inaccessible jurisdictions.

CHAPTER 10

PURPOSE: SOCIAL RAPIST

The term **SOCIAL RAPIST** is therefore not unlike “Revolutionary” or “Insurgent”, but reflects on the active and aggressive engagement to harm, harass, and repeatedly make contact with persons in the interest of destroying not only specific civil contracts of record but also the “right to franchise” and reputation to trade and negotiate of distinct specific persons in targeted activity; of a clear and advantageous design – not permitted by any right afforded by the civil court or title over a child or other service. The electronic nature of such abuse is neither serviced by a civil ORDER OF PROTECTION, for the party already engages in FALSE LEGAL NAME to carry out such activity; but maintains the false claims while recruiting and engaging other persons to divest legal response in a pattern of narcissistic fraud on authority that suggests it is an official action of the State, Federal Justice, or other agency having power over persons; and in concert with injury shows no remorse warranting normal treatment as a civil infraction or felony crime – taking on the character of a foreign armed non-uniformed combatant.

CHAPTER 11

PURPOSE: PATHOLOGICAL SOCIAL RAPIST

The evidence that such abuse is on behalf of and in interest of VERY LARGE CORPORATIONS against VERY SMALL CORPORATIONS and/or BUSINESSES, in antitrust activity and to dilute trademarks and injure credit and securities; through organized and pattern abuse of LEGAL NAME FRAUD and LEGAL NAME in creation of online identities to incorporate injury via GOOGLE LLC technologies and GOOGLE SEARCH and similar ‘impassionate automated data aggregation’ whereby it places the victim in a virtual “PILLORY” for abuse before potential hiring parties and clients through false claims shown in the September 12th 2003 and September 20th 2003 and October 5th 2022 and February 4th 2023 letters of extortion; indicate this is an abuse that GOOGLE LLC shares responsibility for as well as NVIDIA CORPORATION in weaponized and malicious application of Artificial Intelligence and “copyright infringing technologies” like their September 2022 product offering for computer generated art and ChatGP applications.

While it is exciting to see the positive applications of such technologies, such as early YAHOO SEARCH and index, the increasing lack of oversight in these technologies paired with activity similar to MEGAUPLOAD.COM abuse and NAPSTER file sharing likely beyond the speed of the courts, and to assert false data and incitement to the public in an automated fashion beyond human contest and human law; requires that Artificial Intelligence Technology not be limited to select partners in sale or offer, as the abusers and the abused cannot be pre-designated by capital means or large organization or foreign collective designation of preferred partners exclusive of the general public.

The repugnant claim by NVIDIA CORPORATION that it will decide who receives such technology in sale as property in title, while other persons will receive only the right to lease time or use under their direction; already speaks to the violence in 2001-2023 by GOOGLE LLC and YOUTUBE in the case 01-17702 fraud; for which this rule is made for **SEVEN ALPHA™** necessary and obligated notice.

Victims have a right to designate their attacker, especially when that attack is ongoing and repeated and sustained, evident in “**Hue and Cry**” and “**Clameour de Haro**”, English law; and to declare against fraud and other Jactitation of Marriage used to impair and abuse the “reproductive rights” and “intimidate rights” of persons, the sexual nature of such criminal activity as a broad and unlawful conduct whose enterprise must be met and suppressed aggressively without delay for State or Federal Justice to bring an indictment or pursue conviction; as damage to property and real estate and commercial rights are occurring in real time and will result in total liquidation of trade secrets and registered intangible property if action to notify all potential buyers of such stolen goods and pursue the removal of those products from market or their fraudulent sale; for which the State of Texas and State of Oklahoma have abdicated on claim of negligence and incompetence to prosecute computer crime formally.

CHAPTER 12

PERPETRATORS AND MAJOR ACTORS MUST BE SANCTIONED AND REGISTERED

Companies engaged in this manner and publicly, to abuse their rights, are injured in the public and thus entitled to a public LEGAL ANSWER and rebuttal to such abuse; to arrest damage and suppress incitement of violence against their property, person, family, and goods.

The creation of a more serious term than “Deplatforming” or “improper reporting” or other claim for less serious minor infractions not representing a threat to real people, property, and safety – is therefore necessary.

Because terms consistent with physical or verbal abuse are well known, and falsely styled under DOMESTIC VIOLENCE terms which by title designate women rather than all persons as potential victims; or feminize the victim by application of such rights and deny to men those protections from other men who seek violence against them while retaining children and elderly persons as a form of protection from ordinary and natural rebuke – hostages de facto;

The term must be modified to assert that this conduct is not simply “bullying” – an improper but legal communication that is hurtful or emotionally negative – to “actual injury and violation from which long term and medical, psychological, and irreparable harm is done”.

For this reason, we choose to adopt the designation: **SOCIAL RAPE**

It is clear that *Social Rape* is not *Sexual Assault nor Sexual Rape*, and refers to the well known infrastructure of **SOCIAL MEDIA** and related **Electronic Communication for Business and Commerce Essential to Community Trade, Interstate Trade, and Utilities of Business and Employment** distinct from “entertainment services” or non-essential non-commercial use.

Law Enforcement Members who sought to resolve such situations for BUSINESSES RELIANT ON INTERNET SERVICE paid and contracted for, as a utility of commerce, and operation of such place of business vital to subsistence of the business owner and their family; were incorrect in stating “**If you don’t like it, get off the Internet.**” And further in ongoing refusal to perform, “**Business is a contact sport.**” – an endorsement of the violence and child concealment and child abuse used to coerce a registered business in case 01-17702.

As such, and due specifically to the MISGENDER and incitement of arson and physical violence, alleging to speak for “BIKERS AGAINST CHILD ABUSE (BACA)” and other organizations including the United States Department of Defense in allegations of “STOLEN VALOR” and inciting military service members and retired military service members to join in to the attacks in 2021-2023 in case 01-17702;

The designation of this activity as a “**sexual assault against the masculine character**” of a title of FAMILY LAW in abuse of a **father of a child** to obtain commercial and political control over the business of the father and the child, style both as mentally ill due to Native American ethnic traits, and sustain this abuse by COGENT COMMUNICATIONS INC. employees and contractors at 2323 Bryan St Suite 2670 Dallas Texas (USA); obligates a formal registration of such person issuing threats, those documented supporting them in writing, the address of such abuse in documents in 2011 used to create ICANN products to extort in this cause, and the companies in the residency of that location where such activity was done as parties to sanction by **Seven Alpha™** partners.

Overwhelming evidence of this degree, in tone and character, is rare – and the transcripts from 2001 December in masterful deposition provided by a witness then threatened with arson and her building destroyed by fire in 2002, prior letters alleging threat of miscarriage and stalking of a witness in 2003 September, support the importance of bringing public attention to these ongoing threats sustained in 2013 and 2021-2023 as a dedicated hoax to destroy the commercial viability of a family in taking of a child for commercial use and public exploitation activity. In 100s of letters, 84 messages on November 4th 2022 alone, and four false legal names, such persons write their own confession to the designation of such abuse as a sexual crime predicated on fabricated evidence documented in GOOGLE products like “myluv187” account and Yahoo account “hitman4hire”.

CHAPTER 13

FAILURE OF STATE AND FEDERAL JUSTICE REQUIRE REPORT

The refusal to issue a formal letter or comment against such abuse; on concealment of a child to extort; and in pattern threats to persons for association with the family and to overcome their property during illness and after death, and in threats alleging “forced labor” obligations or jail – sustain the need to impose a posse comitatus.

Where such threats, prior to hearings, in order to instigate evidence to falsify further claims of a “Fear of loss of custody or return of a child as if kidnapping”, to suggest a criminal act and seek punishment for such **fear** prior any TRIAL OR INDICTMENT OR CONVICITON – a loss of custodial rights, is evident in case 15-06292393 DENTON COUNTY DISTRICT COURT, and threat of arrest to deny filing of enforcement unless EXCESSIVE FINES were paid in excess of factual income; a form of extortion and “**sale of the court**” violating Oklahoma Constitution Article II-6 against an OKLAHOMA RESIDENT across State and Federal Borders into Chickasaw Nation Reservation.

Victims recognize this stalking in acts of organized violence and organized threats at The Marque Theater in Tulsa Oklahoma April 2010, witnessed by three additional officers. Of which, only one officer has been granted interview and the rest refused by Oklahoma and Texas Courts to carry out a fraud.

Such Systemic Racism enjoined a fraudulent investigation, denying report of theft of benefits and to injure reproductive rights and intimate partner rights in Chickasaw Nation Reservation; against non-Tribe members of mixed race; speaks volumes to the present state of criminal corruption in the State TITLE IV AGENCY non-compliance and their participation in the program as a “State Agency” contrary Federal Register Volume 81 Number 244 Page 93492 and UNITED STATES AGENCY duty as a delegated commission of the UNITED STATES DEPARTMENT OF HEALTH AND HUMAN SERVICES, per 5 U.S. Code Section 101.

Seven Alpha™ must therefore recognize what is Federal Law and REQUIRED STATE LAW in its own commission, and admit that the 5 U.S. Code Section 702-706 right of JUDICIAL REVIEW has not been met or admitted, and denied expressly by the reporting parties in case 01-17702 and 01-17702-R and false civil process in corrupt venue transfer in case 15-06292393 later in 2015-2020 denied due process in full and by double jeopardy in 2018-2023 case FR-2018-00004 initiation in violation of UIFSA Section 314 Immunity; to defraud.

And such intimidation of witnesses to suppress this requires a notice of violence against persons and organization, for which an **Internal Designation** to characterize the stated violence is met with proper force on contact.

SOCIAL RAPE – as a term of intentional harm to disable account services and INTERSTATE COMMERCE, INTRASTATE COMMERCE, or family rights; by fraud and abuse of network communications and data mined from incompetent social media platforms dealing in for-profit exploitation of such data without respect to potential abuse by employees, industry insiders, professional technicians, search technology, or 3rd parties like NVIDIA CORPORAITON; to suggest some lack of liability for the failure to protect persons during violence and interdiction of their family unit from commercial and personal harm through organized solicitation of their community; are a key aspect to bringing accountability against such irresponsible data handling and failure to sanction malicious abuse in human trafficking activity.

Simply using the term “Human Trafficking” conveys a sex work aspect that conventional law enforcement cannot move beyond, even in professional HOTLINE support roles – to admit TITLE IV AGENCY fraud and taking with threat of improper abuse and EXCESSIVE FINES refused UIFSA Section 3 and 6 rights, a clear and evident abuse of BLACK CODES rebuked by Justice Ginsburg in Timbs v Indiana oral ruling and ORDER.

Therefore, “**SOCIAL**” must be incorporated into this concept; and online and digital injure through fraud to deprive persons of the ordinary and necessary “confidence and trust” entitled a real person, a liability for misuse of technology to this degree and in this degree of premeditated malice to injure. Especially where children are the victims and parent-child relationships are the target of such abuse to gain advantage.

CHAPTER 14

AS TERMS: SOCIAL RAPIST & PATHOLOGICAL SOCIAL RAPIST

As terms, the designation is to a severed degree, beyond simple improper humor, to the interdiction of rights required by a person or organization to survive and operate with confidence, secure in their ability to have regular interaction with the public.

Pathological degree – where such behavior sustains beyond a first warning and notice, to show clear criminal intent or evidence of intentional deception such as approach to menace systematically the witnesses in a trial or jury, or to target a community or business for commercial advantage, or falsify work history to fabricate evidence or fabricate witnesses for use in commercial or Federal benefits applications to harm the person; is of a degree requiring CORRECTIONAL DEPARTMENT ASSISTANCE, as those parties are fully aware of their actions and doing so in a clear and premeditated plan until stopped by force.

The misuse and false attribution of a lack of harm or liability – such as turning in a Jewish Girl living in your wall to the Nazis for your own family – while denying the consequences of such action because you are not the actual German Officers who will take charge of the girl, is equally criminal in commercial conduct and software design; as is a data accumulation which – without respect to confidence – may harm persons in a data breach requires additional levels of protection and a PRESUMPTION OF NO SALE WITHOUT AUTHORIZATION BY THE PARTY WHOSE DATA IS BEING USED, and further PAYMENT FOR EACH SALE, are not yet law in the United States – but necessary.

The full understanding of what such persons with a genetic lack of empathy or other high functioning emotional disorder of mind will do with this technology; is not fully incorporated into the law. Such laws were written and conceived prior to the present database oriented world, the speed of such data, and the need for additional safeguards PRIOR TO A DATA BREACH OR SALE OR FRANCHISING OR ACCESS TO SUCH SENSITIVE INFORMATION.

SOCIAL MEDIA COMPANIES and **SEARCH ENGINE DEVELOPERS** entered into that area prematurely, recklessly, and without respect to any future liability – knowingly to take profit and exit prior such long term impact.

SOCIAL RAPE and **SOCIAL RAPIST** and **PATHOLOGICAL SOCIAL RAPIST** therefore apply to 1.) the act; 2.) the party committing the act, often using services they delegate such safeguards or failure to enforce as permission to act repeatedly upon contrary all other norms of society; 3.) and to the repeat offense in such manner by the party showing no regard for the norms of society in criminal or emotionally dysfunctional high order abuse; for which corporations are the means of the act as well as liability for its occurrence an immediate and high order duty of care to make immediate steps and protection – so far not met sufficiently by any SOCIAL MEDIA PROVIDER.

The failure to take steps may result in the company or service or its employees or both being designated as a “SOCIAL RAPIST”, especially for responses like FACEBOOK.COM which employ passive claims of “Community Standards” as separate law not obligated basis norms of society or human decency to deny complaints; and in “PATHOLOGICAL SOCIAL RAPIST” degree where such company sustains this policy of refusing to act unless compelled by law to apply a reasonable standard based in “the local community of the victim” to such fraud; instead relying on foreign workers who often support and applaud such criminal abuse with evident bias.

By recognizing **SOCIAL RAPE** in attacks on the principle rights of persons as a permanent, irreparable, and real injury, contrary false connotation to child-on-child bullying and social awkwardness of pre-pubescent children in a school environment prior adulthood; as well as recognizing the boundaries of suffrage and the right to speak without editorial oversight of prejudice or religious opinions – such as sexual orientation – without being attacked and penalized for expressions of heterosexuality or natural masculine ideas. These abuses apply when homosexual and emotionally incompetent persons attack 2nd Amendment (gun rights) and masculine targets as well. The idea that homosexual and bisexual commentary is abusive, defamatory, and improper – is not widely supported and even openly denied by TWITCH.TV in its activity, intimidating many heterosexuals against streaming there or criticizing certain tenants that the platform (AMAZON INC.) deems to be “settled science” – policy of sexual conduct contrary the norms and rights of many Christians and Muslims worldwide.

CHAPTER 15

SOCIAL RAPE in Religious Aspects

At the core of “SOCIAL RAPE” is the assault to humiliate and discourage others to stop sharing their religious and personal views, in favor of a collective fantasy of unity; often enforced by violence and abuse.

Muslim and Christians have already observed this on FACEBOOK and TWITCH.TV, and many content developers have moved to RUMBLE and other services because of the open intolerance and “hate raids”, fraud, and automated stalking facilitated by the API abuse afforded by AMAZON INC. and FACEBOOK “like” and “comment” features limited and dysfunctional design. Receiving praise is easy, when in private, among a select group; but in public any controversy is met with sufficient abuse to disable any small business without a dedicated public relations agency, and a huge negative impact on the business in a single attack even after years of developing the audience on that platform. This does not improve the platform, and makes it a tedious and irrational place for any serious or mature transactions or discussions. Often to the point of personal danger.

Despite this, employers continue to rely on SOCIAL MEDIA PLATFORMS as a means of investigating their potential hires, and so services like LINKEDIN.COM have created wholly negative and abusive organizations around the fantasy of that corporate professional life; from which similar abuse still occurs and is targeted to injure small business and small firms.

LINKEDIN.COM data was actually obtained, also, further lowering its standing; as was the data from INFRAGARD records in 2022; and found for sale on the Internet.

Events like this obligate additional security and strong diversified privacy that such services do not provide; an a partnership with a company that can be trusted to carry out protection without engaging in information gathering or administration of private vendors in those areas of services – like online multi-user games or virtual worlds.

CHAPTER 16

SOCIAL RAPE in NVIDIA OMNIVERSE

Inappropriate contact in virtual worlds and in context to behavior toward female users are already extremely common, making such products like VR CHAT and later platforms suspect.

While the VR CHAT environment is very juvenile, it is established and not going away. Social abuse is limited; and the transitory nature of such real time communication is preferable to the newsfeed availability and vulnerability of interactive Web 2.0 vandalism favored by SOCIAL RAPE activity.

Web 2.0 – interaction with the public as an application – was always vulnerable to this abuse.

Web 3.0 – real time interaction through video applications and chat which are themed to be transitory, seem relatively secure in contrast; but real time recording of these interactions despite safeguards make content developers extremely vulnerable to abuse and exploitation – eliminating all but the most casual and immature, and the most produced, from commitment to the medium as a business platform due to risk.

Video affords protection against abuse that can be very extreme – but YOUTUBE and GOOGLE also afford the avenues for abusers which ALPHABET INC. has not taken appropriate steps to curb or respond to in matters of serious injury and ongoing injury (human trafficking). Wholly disregarding such injury to the civil liability that victims must carry through litigation – both against GOOGLE LLC as a shell company to shield ALPHABET INC., and in the diverse access to platforms that now afford any moderately sophisticated person to launch a server in any country with immunity to foreign law, featuring a video that would be deemed sexually abusive of the persons in it and released without their permission, to injure, and for profit.

Any transmission or upload of a video to any service over the INTERNET for viewing or hosting, regardless of pay, is COMMERCIAL USE, and that fact makes the use of body cameras and release of such content on demand to persons by law enforcement in confrontations and domestic violence circumstances a severe source of additional injury to victims of organized stalking and physical violence.

As the Internet of Things (IoT) expands, to incorporate more real-time video with live broadcast and recapture, this issue is only going to become worse; and like the use of drones – unlicensed use is inevitable and profitable similar to prior telephone scam call centers and similar abuse of mass communications in a “loot and scoot” scenario to take profit and disappear before repeating the operation in another location until law enforcement is too tired to act against those perpetrators – and accept the calls as a part of daily life.

Rather than normalize “sexual assault” incorporating REAL WORLD PROPERTY AND RIGHT TO WORK aspects, which take these matters into the real world, work, and family support rights against harassment; **Seven Alpha™** has chosen to move forward with a designation of persons to simplify this extreme misconduct.

It is our hope that the network will provide an example to stop this abuse, and put such conduct in the proper place it deserves regardless of the ineffective and low prescribed penalties conceived over false allegations and to minimize the injury to persons of false allegations by affording repeat offenders and premeditated or emotionally disturbed defenders to enjoy and rely on light punishments for heinous and evident proven acts of injury – acts that no parent or person of competent character in the correctional system can abide.

Molesting a parent to keep them from their child, so that the child can be abused, and to sustain a cause of action in that abuse to maintain control over a child is child abuse and sexual abuse in false character of persons which affect the development of the child. That we have to expressly state this is a form of violence against the intimate relationship between a parent and child to demand relief by expressly declaring it “**SOCIAL RAPE**”, and the value of “**SOCIAL**” relationships and interactions with the public and with the child as a peer free of duress or fraud are a reserved right; equally held to sexual acts and reproductive acts, and essentially an expansion of the prior prohibition on **Corruption of Blood** – a punishment to instill hatred by a child against their sire for his contempt of the Crown that they shall be denied all honor until he dies, implying they should kill him to be redeemed, is common in the SOCIALIST theme of “disposing of the parent” in favor of acceptance by society and replacement of the parent and parental authority with society.

To Christians and many people – this is fundamentally offensive and repugnant, as would be forced marriage or polygamy to many women. It is a reduction in the esteem, dignity, and honor afforded and expected of a partnership – as it is a form of sexism which to many suggest the role of the female is to be a utility to the male, not a partner. While this is not universal in Islamic culture, there are still communities who practice this in the United States, as there are in the Muslim World, and do so in a way that is shameful and does not please Allah.

While such conduct, and the very term (rape) arise from this contractual and community-standards basis of forced or obligatory sexual performance, upon entry and for rights and protection of society – the concept that we are MARRIED TO THE SOCIAL MEDIA, and obligated to submit – is as much haram and its abuse “rape” of the rights we are entitled to as human beings and legal persons, and not excused by consent or need to participate in such services to compete in a marketplace or remain in communication with our friends and community.

Persons who are engaged in interference in such rights, therefore, are owed as much consideration as a husband who rapes his wife on the wedding night, abusing the gift that Allah has put before him; and corrupting the institution of Allah as would any offense against his creation and the dignity of its making.

While we may not resort to Sharia in this, in all cases, it tends to make the point – that persons come to the marketplace to trade; and we cannot afford any person to be abused in their dignity or their family or their rights, nor by any merchant against another, to gain advantage and drive out those persons or seize their goods where there is to be peace. It is death by work, and the destruction of the means of work, done to injure; under color of a right of society – and when sustained – society bears the shame and the debt for the act in not stopping it.

CHAPTER 17

SOCIAL RAPE as a non-sexual versus sexual character

In the world of “gender” and “imputed gender identity” popular in the West; the idea that a gender comes with certain rights and privileges is at fault for such abuse – as is the assault upon the masculine by those same groups and persons to demonize what is male, a form of sexual abuse, which goes beyond touching and probing to be fully and clearly a component of intimidation and menace to conceal and oppress the expression of such character also.

It is the Hajib of men, to conceal the fact they are men, compelled upon persons in SOCIAL RAPE, and to remove from them the honor of men and the honor of adulthood – as Western women say, to ascribe their partner as a “man child” or “infantile” in character, that they should assert a power over him for his resistance to her will; to the extent of abuse and objectifying him as though he were a commodity to be exchanged at will for her pleasure while demanding intimacy and affection from him in delusional pathology.

This assault on the intimate nature and character of men, and to abuse and destroy their bond with their children and the respect of their children for their father (or mother), by systematic abuse; has never had such a weapon as SOCIAL MEDIA and the ability to incite groups of such people to abuse persons systematically.

That these people do not see this as a “RAPE” or sexual assault on a real person in attack on the legal person to disable their rights and slander of title paired with larceny of property to deprive them of a child, is ignorance.

That they do not see the sexual assault is one shared with the children witnessing such abuse, is criminal.

CHAPTER 18

BE IT SO RESOLVED,

For the reasons stated above, Seven Alpha™ will therefore impose the regulatory rules and designations so described, established, and suitable to combat a serious and ongoing criminal pattern of violence.

SOCIAL RAPE

SOCIAL RAPIST

PATHOLOGICAL SOCIAL RAPIST

Will be entered into our records in report of persons and the sexual harassment done by them, by the INTERNET SERVICE PROVIDER used for such conduct, and in PERMANENT RECORD of such conduct in construction of “unwanted sexual contact” sustained under color of United States Benefits denied by Federal Law and violation of rights of persons and children, under formal criminal complaint, themed abuse of SOCIAL MEDIA PLATFORMS and in concert with an antitrust complaint to the Federal Trade Commission in release September 2022 of NVIDIA CORPORATION “NVIDIA OMNIVERSE” product and other services utilizing such media fabricated for sexual child abuse to market and sell data derived from protected works and in activity promoting the trafficking of real children over 2001-2023 themed in documents from case 01-17702, DALLAS COUNTY DISTRICT COURT, STATE OF TEXAS; evident in a pattern of activity obligating a designation separating it from “bullying” activity or other minor offense to qualify with criminal enterprise and nexus with 2323 Bryan St Dallas Texas and data center partners of NVIDIA CORPORATION in unfair business practices and violence with sexual coercion. Abuse of a legal person to impair a natural person in reproductive rights, employment, and withhold children for forced labor is criminal.

CHAPTER 19

REICHSTAG TACTICS: REDUX

These are the same tactics used by the 1933-1944 German Regime, targeting Jewish families through “registration” and purity testing, psychological testing, and direction of investigation of neighbors for their opinions –

Substituting the SOCIAL MEDIA PROFILE and content as the papers of travel and commerce; and to take such papers and mutilate them or destroy them systematically and regularly to impair travel, prevent escape, and to do so in intimidation of the person and their customers and employees to show their lack of power in a sexual manner enjoined other threats of sexual context (false presentation of persons as a spouse, in IDENTITY THEFT, April 4 2022 to Feb 4 2023).

Such conduct by COGENT COMMUNICATIONS INC., EQUINX, DIGITAL REALTY TRUST INC, and NTT GROUP employees and contractors; convinces us that these groups are engaged in democratic nationalist activity through the letters from 2323 Bryan St Suite 2670 Dallas Texas over 2001-2023, and in ongoing fraud to extort;

Employing then FACEBOOK.COM, TWITTER.COM, CRAIGSLIST.COM, GOOGLE LLC, SITES.GOOGLE.COM, and registration of names to do so; which obligate a formal policy change and designation over other forms of lesser abuse to constitute serious IDENTITY THEFT, threat of sexual assault and physical assault, repeated unsolicited communication, solicitation to intimidate and menace multiple clients; and ongoing activity from November 14th 2021 to February 5th 2023 in concealment of a child and abuse of the IDENTITY OF A DECEASED GRANDPARENT of that child in 2003 and 2022 to maintain their removal and concealment from habeas corpus and ORDERED POSSESSION as an organization.

This conduct disbars such companies from serious bidding and security by our firm, by all **Seven Alpha™** partners, and raises serious questions which should be considered at the Federal and International level; on communications and incitement of violence affecting patents filed from August 11th 2001 to present (2023 February) or later.

The use of such tactics to seize Jewish goods, wealth, art, homes, and property – are no different than this fraud; and the abuse and ongoing tactics and name use sustain that a legal sanction of Federal antitrust should be pursued against GOOGLE LLC and ALPHABET INC., of State of Delaware. It will be our recommendation that such process should proceed, for cause; and cite the prior companies role in the letters threatening and repeated unlawful and abusive communications to our office from 2001-2023, including 2021-2023 sustained abuse after the missing child was an adult to support commercial forfeiture of domestic competitors of GOOGLE LLC and ALPHABET INC., and overcome NVIDIA CORPORATION relationships with the firm and EVGA CORPORATION, our supplier during such April 2022 threats to our office and demands upon that firm to drive it from the marketplace.
